

Rough Terrain Trolley

ParAid's Rough Terrain Trolley is a rugged stainless steel stretcher and patient transport trolley with wide pneumatic tyres for use in remote areas or over rough terrain, such as from helicopter landing pads to hospitals over gravel, grass and uneven ground. With hydraulically operated height adjustment of 800mm-1100mm, patient handling crews do not have to lift or carry the patient over distances, thus avoiding potential back injury and other musculoskeletal injuries. The ParAid Rough Terrain Trolley is designed using all-weather durable construction and materials for dependable outdoor use 365 days a year.

- Patient Load Capacity - 200kg
- Flat, rubber covered stretcher platform 2000mm x 600mm
- Height adjustable hydraulic platform from 800mm to 1100mm
