

## Transporter+ Incubator Trolley

The Transporter+Plus series is a range of bespoke incubator trolleys designed for road transport, both emergency and elective. Developed in partnership with clinicians and transport teams, we translate the precise needs of the end user into highly useable and functional systems for transporting neonates.

- Designed and manufactured in stainless steel, aluminium and lightweight composites
- Transporter+Plus trolleys designed to accommodate all of the UK's most widely used incubators
- ParAid Medical's 'Easi-Lock' trolley attachments are compatible with commonly used 2-part locking devices

ParAid House, Weston Lane, Birmingham B11 3RS T: +44 (0)121 700 7455 F: +44 (0)121 700 7454
