

REDUCES
MOVEMENT AND VIBRATION
DURING TRANSFER

NEO-RESTRAINT

The Neo-Restraint is a harness system designed to safely secure neonates within an incubator. Designed in collaboration with clinicians, the Neo-Restraint helps reduce movement and vibration, both of which are harmful to a neonate.

Designed for neonates of 0.5kg-6kg, the Neo-Restraint comes in three sizes, colour coded for ease and is machine washable. It is compatible with all baby warming devices and is quick and easy to fit.

KEY BENEFITS:

- Safe and secure
- Compatible with multiple incubators
- Compact storage

FEATURES:

- 1 Soft Wedges**
The wedges remove pressure points, providing the neonate with non-abrasive support.

- 2 Adjustable Straps**
Easy to fit, fully adjustable straps wrap around the Neo-Restraint bars, keeping the neonate secure.

- 3 Machine Washable**
The Neo-Restraint can each be washed at 60° C max temp. The wash bags keep the Neo-Restraint together when washed.

- 4 Storage Bag**
Provided to store the 3 individual wash bags.

- 5 Neo-Restraint Bars (SOLD SEPARATELY)**
The bars fit inside the incubator, allowing the adjustable straps to be fastened securely. Contact us for more information.

SIZES:

Colour coded and designed to secure neonates ranging in weight from 0.5kg to 6kg.

- Small (blue) 0.5kg – 1.5kg
- Medium (polar white) 1.2 – 4kg
- Large (lilac) 3.5 – 6kg

INCUBATOR COMPATIBILITY:

- International Biomedical Airborne Voyager
- Atom Transcapsule V808

- International Biomedical Airborne Aviator
- Draeger TI500

- Atom IncuArch Transport Incubator

ACCREDITATIONS:

- ISO 13485: Medical Device Quality Management
- ISO 9001: Quality Management System
