

PET-T

Designed to reduce medical device breakages and damage, whilst protecting patients and medical teams during inter-hospital transfer. The PET-T, securely accommodates a wide range of medical equipment and its versatility allows medical teams to arrange medical equipment in the optimum layout. Providing clear visibility and accessibility it is proven to reduce internal transfer times by 50%.

FEATURES:

- 1 IV Pole**
Telescopic poles x2 with 2 hooks on each for fluid bags, maximum weight for each pole is 3kg.

- 2 2 x Medi-Rail**
Holds up to 20kg of equipment each.

- 3 Medical Device Shelf**
Supplied with straps to hold medical equipment with a payload of up to 35kg, designed to provide multiple combinations for organising equipment.

- 4 Power Delivery Unit**
A power source for 12 independent pieces of equipment. The mains cable is "break" protected to prevent damage to the wall plug or the PET-T.

- 5 Cylinder Holder**
Stores up to 3 cylinders: HX, E and CD sizes.

- 6 Full Height Grab Handles**
Ergonomically designed to manoeuvre the trolley.

- 7 Adjustable Docking Lever**
Secures the trolley to the hospital bed, the levers adjust when the bed is positioned into place.

- 8 Braked Castor Wheel**
To lock and secure trolley in place without risk of movement.
