

## TRANSPORTER INFINITE AERO

The Transporter Infinite Aero™ is a critical care trolley designed for air ambulance transfer. Elevating up to the door level of an aircraft, it enables neonates to be transferred smoothly into an air ambulance. With two-part floor locks, the Transporter Infinite Aero™ can be secured into a front-line ambulance restricting movement during road transfer.

### KEY BENEFITS:

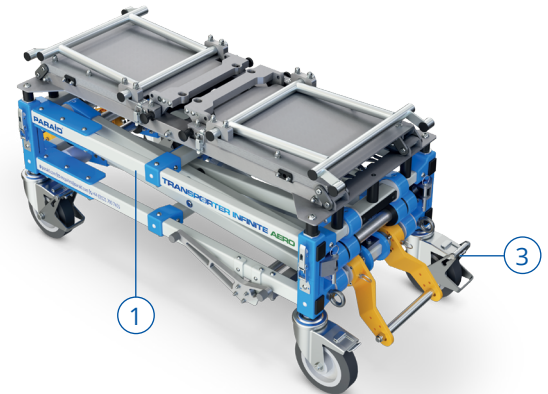

- i** Ultimate flexibility in framework and equipment configuration
- i** Capacity to transfer neonates between hospitals, ambulances and aircrafts, using one piece of equipment
- i** Compact footprint
- i** Easy to manoeuvre
- i** Folds quickly for onward transportation and safe storage

### FEATURES:

- 1 Framework**  
Constructed from lightweight, high strength aluminium weighing 70-80kg. With a payload capacity up to 145kg. Assembled with precision machined components.
- 2 Hydraulic Lift**  
Elevates receiver bed up to a maximum height of either 1080mm or 1300mm. No reliance on electrical equipment during elevation.
- 3 Receiver Bed**  
Compatible with Lifeports Aerosled, includes locks that engage to keep the aerosled secure. Locks can be positioned to required specification.
- 4 Hand Locks**  
Provide a secure and stable base prior to elevation.
- 5 Ambulance Locks**  
Trolley engages with ambulance floor locks to secure during transfer. Easily folds away underneath the trolley when being stored, reducing the overall storage footprint.

### OPTIONALITY:

- ✓ **Modular assembly**  
Disassembles into three sections for storage and ease of transport.
- ✓ **Fixed assembly**  
Enables a critical care trolley to be stored as a single module in an air ambulance.

### ACCREDITATIONS & SERVICES:

- ✓ ISO 13485: Medical Device Quality Management
- ✓ ISO 9001: Quality Management System
- ✓ Aftersales, Health Check & Repair (additional cost)
- ✓ FEA - Simulation tested solutions (optional)

### INCLUDES:

- ✓ Bespoke Design Service
- ✓ Full technical manual
- ✓ 1 year warranty
