

TRANSPORTER INFINITE MAX

The Transporter Infinite Max™ is a critical care transfer trolley designed to accommodate patients, up to 250kg (39 stone) and house medical equipment onboard. With unique knee elevation and support arms, the Transporter Infinite Max™ provides comfort to the patient as well as medical support. With the capability to transfer bariatric patients, the Transporter Infinite Max™ offers greater flexibility for transfer teams.

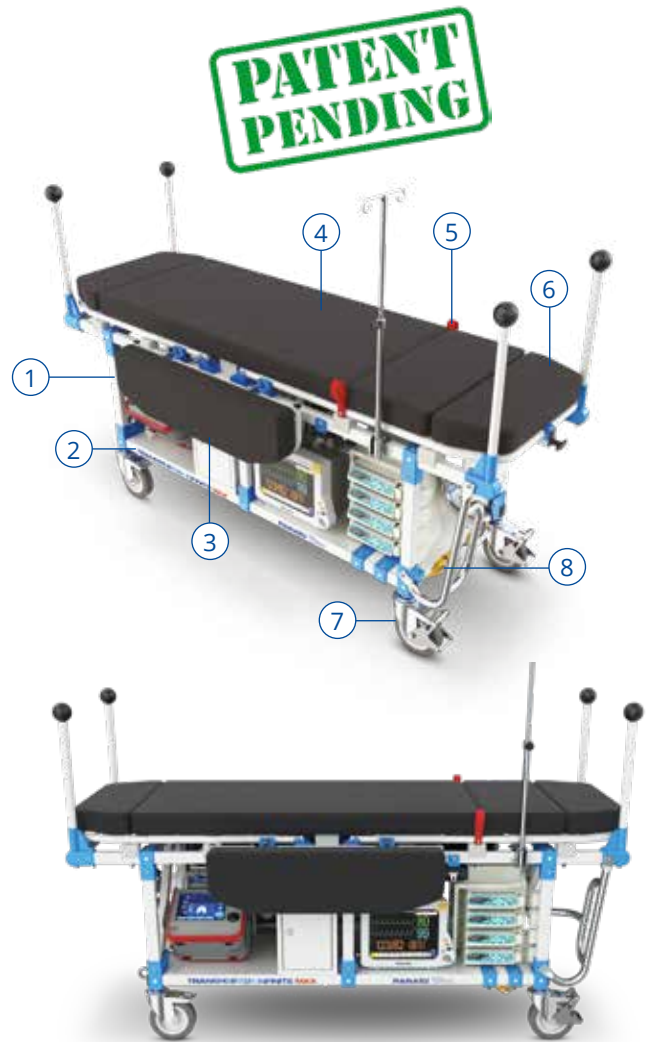

Durable and flexible in its design, the layout and positioning of critical care equipment can be customised through our **bespoke design service**, enabling medical teams to work directly with our R&D Team, to configure the medical equipment layout to meet their precise requirements.

KEY BENEFITS:

- i** Ultimate flexibility in framework and equipment configuration
- i** Greater versatility for transfer teams
- i** Easy to manoeuvre
- i** Provides increased surface area for patient comfort
- i** Compatible with two-part ambulance floor locks

FEATURES:

- 1 Reinforced Framework**
Constructed from lightweight, high strength aluminium. Reinforced to support bariatric patients, with a payload capacity up to 250kg. Assembled with precision machined components.
- 2 Directional Lock**
Prevents wheels from rotating, improving overall control and safety when unloading from an ambulance.
- 3 Raisable Side Arms**
Once raised, the side arms automatically lock in to position which creates additional surface space for bariatric patients.
- 4 Back Rest**
Fully adjustable up to a 70° angle, from lying flat to upright position.
- 5 Adjustable knee brake**
Allows the patients knees to be lifted when seated or lying down and prevents them sliding down the trolley.
- 6 Leg Raise**
Elevates the legs above the heart to improve blood circulation. Operated with ergonomic pull handle system.
- 7 Anti-static Castor Wheels**
360° swivel, with foot brake. Robust, yet soft enough to reduce vibration.
- 8 NEW Adaptive Lock - compatible with two-part ambulance floor locks** **PATENT PENDING**
Secures and locks the Transporter Infinite Max™ into a road ambulance, reducing movement.

Various equipment configurations available.

ACCREDITATIONS & SERVICES:

- ✓ ISO 13485: Medical Device Quality Management
- ✓ ISO 9001: Quality Management System
- ✓ Aftersales, Health Check & Repair (additional cost)
- ✓ FEA - Simulation tested solutions

INCLUDES:

- ✓ Bespoke Design Service
- ✓ Full technical manual
- ✓ 1 year warranty
