

TRANSPORTER INFINITE NEO

The Transporter Infinite Neo™ is a critical care transfer trolley designed specifically for neonates. Developed in partnership with medical specialists, it provides a safe and secure method of transfer by ambulance, for the clinical team, neonate and medical equipment.

Durable and flexible in its design, the layout and positioning of critical care equipment can be customised through our **bespoke design service**, enabling medical teams to work directly with our R&D Team, to configure the medical equipment layout to meet their precise requirements.

KEY BENEFITS:

-  Ultimate flexibility in framework and equipment configuration
-  Easy to manoeuvre
-  Safe and secure
-  Minimise vibrations
-  Compatible with two-part ambulance floor locks

FEATURES:

- 1 Framework**
Constructed from lightweight, high strength aluminium. Assembled with precision machined components.
- 2 Directional Lock**
Prevents wheels from rotating, improving overall control and safety when unloading from an ambulance.
- 3 Anti-static Castor Wheels**
360° swivel, with foot brake. Robust, but soft enough to reduce vibration.
- 4 NEW Adaptive Lock - compatible with two-part ambulance floor locks **PATENT PENDING****
Secures and locks the Transporter Infinite Neo™ into a road ambulance, reducing movement.

INCUBATOR COMPATIBILITY:

- ✓ International Biomedical Airborne Voyager
- ✓ International Biomedical Airborne Aviator
- ✓ International Biomedical Airborne 750i
- ✓ International Biomedical Airborne 185A+
- ✓ Draeger TI500
- ✓ Atom V808
- ✓ Atom IncuArch

Various equipment configurations available.

ACCREDITATIONS & SERVICES:

- ✓ ISO 13485: Medical Device Quality Management
- ✓ ISO 9001: Quality Management System
- ✓ Aftersales, Health Check & Repair (additional cost)
- ✓ FEA - Simulation tested solutions

INCLUDES:

- ✓ Bespoke Design Service
- ✓ Full technical manual
- ✓ 1 year warranty
