

CONVERTS FRONT-LINE
AMBULANCE STRETCHERS
INTO MEDIUM DEPENDENCY
CRITICAL CARE STRETCHERS

ADAPTER +

The Adapter+ is a flexible, critical care conversion kit, which securely stores life saving equipment during road transfer. Designed to convert standard Stryker® Power-PRO TL and Stryker® Power-PRO XT ambulance stretchers, into medium dependency critical care stretchers.

Crash tested to BS EN 1789, the Adapter+ enables ambulance teams to accommodate a wider variety of patient care needs.

KEY BENEFITS:

- Quick and easy to install and use
- Allows medical teams to provide a wider range of care to patients
- Configurable to transfer team requirements
- Additional equipment can be added, offering greater flexibility

FEATURES:

- 1 Equipment Pole with I.V. Hook**
Telescopic pole with two locations for fluid bags - maximum weight 10kg.

- 2 Equipment Bridge**
Houses medical equipment up to 15kg, such as a ventilator and patient monitor.

- 3 Pole Mount**
Secures the Adapter+ kit to the stretcher.

- 4 Medi Rail**
Secures equipment close to head end, weight limit 10kg.

- 5 Foot End Medi Rail**
Secures vital equipment to the side of the stretcher, weight limit 10kg.

- 6 Cylinder Tray**
Holds up to two D or CD size cylinders.

All Adapter + accessories have been crash tested to BS EN 1789.
